# **NEWALA DISTRICT COUNCIL**

# **STRATEGIC PLAN 2017/18 - 2021/22**

Prepared by: Council Management Team Newala District Council

#### **FOREWORD**

I am very grateful to all stakeholders including Council Management Team for participating in one way or another in preparation of our 2017/2018 – 2022/22 Strategic Plan.

The prepared document provides strategic direction of the council for the coming five (5) years. The document spells out council's vision, mission, core values, key results areas, objectives, strategies and targets during. It also describes the key performance indicators which will be used to monitor performance and the financing plan.

However, preparation of this strategic plan has reflected various issues found in the National Planning Framework, sector policies, CCM manifesto, lessons and experience gained during implementation of last strategic plans.

Strategic plan for the Medium Term period 2017/18 - 2021/22 is an important instrument for the implementation of policy decisions to improve service delivery as pointed out in our vision and mission.

Newala District Council Vision Statement is:

"To be a council which provide high quality services to all her stakeholders by 2022"

Again; its Mission Statement is; "Newala District Council shall undertake the responsibility of providing qualitative Socio-economic services by involving all other stakeholders in utilizing the available resources sustainably, in line with priorities laid down by its people and adherence to good governance principles".

Finally, it should be noted that successful implementation of this plan will requires commitment and accountability by NDC staff, availability of resources, an endless stakeholders' cooperation with our LGA and regular performance reviews.

MUSSA M. CHIMAE

DISTRICT EXECUTIVE DIRECTOR,
NEWALA

#### **ACKNOWLEDGEMENT**

I would like to express my sincere appreciation to the Council Management Team and all stakeholders who participated in the whole process of preparation of this Strategic plan for the Medium Term period 2017/18 - 2022/22. Without serious commitment, I believe it would not have been possible to make the process being completed successfully.

The preparation of this plan is one thing and implementation of it is another thing. Successful implementation of plans and budgets to a large extent depends, among other things, on adherence to rules, regulations and procedures and the like. It is therefore imperative to urge all our council's stakeholders to ensure that each one plays its role while adhering to laid down laws, rules, regulations, procedures and relevant quidelines.

The major responsibility of the council is service delivery to all the people within its area of jurisdiction. This can most effectively be sustained if discharged in a participatory manner. It is for this reason that the council emphasizes the involvement of all of her stakeholders in the whole process so as to improve quality, quantity and accessibility of social, economic, administrative and other services.

Last but not the least, it is important to remind all stakeholders of Newala District Council to stiffen their efforts in mobilizing and sensitizing the communities so that the implementation of this plan becomes a success, while taking into account 'Hapa Kazi Tu" as a guiding developmental slogan. This is in recognition of the fact that the resources sought from sources outside the council frontiers are meant to complement and not substitute communities' efforts to bring about their development in a sustainable way.

JUMA I. RAHISI

DISTRICT PLANNING OFFICER NEWALA DISTRICT COUNCIL

#### **ABBREVIATION**

BRERA – Business Registration Regulatory Authority

CBOs - Community Based Organisations

COBET – Complimentary Basic Education in Tanzania

SEDA – Small Enterprises Development Association

TANESCO – Tanzania Electricity Supply Company

TIC – Tanzania Investment Centre

TIN – Tax Identification Number

TRA – Tanzania Revenue Authority

URT – United Republic of Tanzania

#### **CHAPTER ONE: INTRODUCTION**

#### 1.1 Background

Newala district council has prepared this Strategic Plan (SP) to replace the expired one which was saved for the period of 5 years from 2012/2013 – 2016/17. This document will exist for another period of five years 2017/2018 – 2021/2022. Development of this SP aimed at setting council strategic direction which will guide the council's efforts in achieving organization's goals.

During preparation of this document, various stakeholders involved in different stages, challenges and weaknesses have been clearly analyzed, and possible solutions for existing challenges have been proposed towards accomplishment of noticeable organization outcomes. It is believed that once the presented strategies will be properly focused, the council will be in position of allocating scarce resources according to priorities set out by each sector.

Apart from other things, preparation of this document has taken consideration of existing environment of Newala district Council, socio-economic wellbeing of the natives, Tanzania Development Vision (Vision 2025); The Ruling Party Election Manifesto (2015), The Medium Term Strategic Planning and Budgeting (MTEF), Various directives from National, Regional and District leaders, various Sector policies, Sustainable Development Goals etc.

Strategic plan for the Medium Term period 2017/18 - 2021/22 is an important instrument for the implementation of policy decisions to improve service delivery as pointed out in our vision and mission.

Newala District Council Vision Statement is;

"To be a council which provide high quality services to all her stakeholders by 2022"

Again; its Mission Statement is; "Newala District Council shall undertake the responsibility of providing qualitative Socio-economic services by involving all other stakeholders in utilizing the available resources sustainably, in line with priorities laid down by its people and adherence to good governance principles".

It should be noted that successful implementation of this plan will requires commitment and accountability by NDC staff, availability of resources, an endless stakeholders' cooperation with our LGA and regular performance reviews.

#### **CHAPTER TWO: DISTRICT PROFILE**

# 2.1 Geographical Location

Geographically, Newala District is located in South East of Tanzania between longitudes  $39^{0}$  -  $40^{0}$  East and latitudes  $10^{0}$  –  $11^{0}$  south of equator. The district is situated 900m above sea level at the escarpment of Makonde plateau.

It is bordered to the West by Masasi district, to the East by Tandahimba district, to the North by Lindi Region and to the South by Newala Town Council.

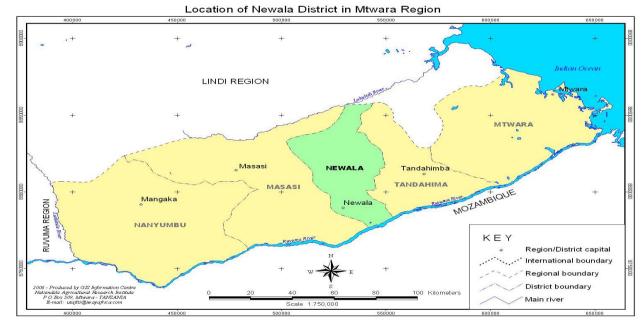

The district has two seasons; a warm humid rainy season from November to May and a cool dry season from June to October. The average rainfall is 1,000 mm. The rainfall is irregular and unreliable due to climate changes. Annual mean temperature is  $23^{\circ}$ c.

#### 2.2 Administrative Units and Land Area

Newala District council has 4 divisions which are Chilangala, Kitangali, Mchemo and Mkwedu. It has 22 wards and 107 villages and 34,000 Households. It borders Lindi region to the North, Masasi to the West, Tandahimba to the East and Newala Township (Town Council) to the south.

Newala district covers a total land area of about 1,606 sq. kms whereby all area has been covered by dry land only. Newala District lies at about 900 metres above sea level on the Makonde Plateau.

Distribution of land area in Newala District council shows that Kitangari division had the largest land area (686 sq.km) followed by Chilangala (650sq. km), and Mkwedu (265 sq.km). However, the fourth division which is Mchemo is new one and its area is shared with Kitangari division.

Source: District Executive Director's Office, Administration Department, Newala District Council, 2017

At ward level, Table 1.2 shows that Chilangala Ward has the largest land area having 247sq.km constituting 12 percent of the District's total area followed by Mnyambe ward with 125 sq.km; However, it has been observed that the surface area of Newala District Council has not coverage with any water area.

However, four (4) wards namely Mnyeu, Muungano, Mpwapwa and Mikumbi originated from amongst the mentioned wards above. Hence, their land coverage has been included in the former wards.

# 2.3 Population

Population is the number of all the organisms of the same group or species which live in a particular geographical area, and have the capability of interbreeding whereby for this category it mean human being. The size, structure, distribution and quality of a population are among the important parameters for economic development. The growth and distribution of the population also determines the demand for food, water, energy and other natural resources and location of essential social services, such as education, health, water, transport and housing for its survival.

#### 2.3.1 Ethnic Groups

The dominant indigenous ethnic group in Newala district makende which is the most dominant tribe. The majority of the indigenous people in Newala District were Bantu origin. The Makende makes 99 percent of the whole Newala population. This group is followed by Makua and Yao mainly from nearby Districts of Masasi and Nanyumbu. Most of the residents are engaged in Cashewnut production and subsistence farming of paddy, sweet potatoes, cassava, millet and maize.

#### 2.3.2 Population Size and Growth

According to 2012 population census, the district had 205,492 people, compared to 183,334 inhabitants counted in 2002 Population Census, resulting in a significant increase of 21, people, equivalent to 11.7 percent during the inter-censal period. The district accounts for 16.2 percent of the total population of Mtwara region.

Doubling time is another key population indicator which shows how many years the region or council would double its population. This indicator alerts the decision makers to review their socio-economic goals and targets take into consideration of expected socio-economic pressures caused by their demands. Figure 1.1 also shows that population of Newala council will double after 60.8 years. Doubling time vary across the councils, ranging from 42.9 years (Mtwara-Mikindani) to 63.1 years in Tandahimba district council.

Figure 1. 1: Estimated Doubling Time (Years) by Council, Mtwara Region, 2012 70.0 62.7 63.1 60.8 59.8 60.0 50.8 46.7 50.0 42.9 40.0 30.0 20.0 10.0 0.0 Antwara Mikindaniwa Masasi District TandahimbaDC Waryumbude Managa District Doubling Time

# 2.3.3 Population Density

Data in Table 1.4 shows population density for Newala district in 2002 was 86 persons per sq. km. The figure increased to 97 in 2012. The council had ranked the fourth council in both years in the Region for being densely populated in comparison with other councils as shown in table 1.4 below. Figures in the table 1.4 show that in both years of census; Mtwara-Mikindani Municipal council is most densely populated than any other council in the region for having 565 and 664 persons per sq.km in 2002 and 2012 respectively. It is followed by Masasi TC with 234 persons per sq.km in 2002; and 271 persons per sq.km in 2012.

Source: NBS, Compiled Data from the 2002 and 2012 Population Censuses Reports, 2015

Table 1.5 gives the population density at the ward level for the census 2002 and 2012 years. In 2002, Luchingu ward with a population density of 463.8 persons per sq. km was the most densely populated ward followed by Mcholi I, Makote and Makukwe ward with 247.2, 188.5 and 162.5 persons per sq. km. respectively.

In 2012 it has been observed again that Luchingu ward became the most populated ward with population density of 396.2 persons per sq. km followed again by Mcholi I as it was in 2002 Census, Makote and Mtonya with 275.7, 229.3 and 192.7 persons per sq. km respectively. While, Mkoma II and Chilangala ward with 24.2 and 39.1 sq. km respectively had smallest population densities in the District (Table 1.5).

#### 2.3.4 Population Change

Table 1.6 shows that the population of Newala district increased by 12.1 percent between 2002 and 2012. The District's population increased from 183,344 in 2002 to 205,492 in 2012, an increase of 22,148 people. However, there was significant variation in percentage increase of population at ward level, ranged from 4.5 percent in Maputi ward to 26.6 percent in Nanguruwe ward. The negative variation in percentage decrease of population in some wards which ranged from -64.7 percent

in Mkoma II and -14.6 in Luchingu wards were attributed by changes of administrative rearrangements at village and ward levels occurred between 2002 and 2012.

#### 2.3.5 Dependency Ratio

The Dependency Ratio is a measure which shows the load the economically active population has in supporting the young and the old populations who are termed as dependents. The Age dependency ratio therefore gives the number of persons of age 0 - 14 years and those of age 65 years and above for every 100 persons of age

15 – 64 years. As Table 1.7 shows, at district level during 2012 Census, economically active population in Newala district had lower burden of supporting dependants out of 82.3 dependants depends on 100 persons of age 15 – 64 years. In 2012 population census shows that Nanyumbu district council had the largest dependency ratio of 92.2 followed by Mtwara district with 89.2.It has been shown that the dependency ratio for all Mtwara Region Councils is lower as the dependency age (0-14 and above 65 years) was 574,261 people compared to active economically population (15-64 Age) which was 695,828 people . The table below shows the dependency ratios by Council, Mtwara Region in 2012.

Table 1. 6: The Dependency Ratios by Council, Mtwara Region; Tanzania Mainland, 2012

|                  | Dependant       | Population |         | Economically | Dependency |  |
|------------------|-----------------|------------|---------|--------------|------------|--|
| Council Name     | 0 - 14<br>Years | 65+ Years  | Total   | Active       | Ratio      |  |

#### 2.3.6 Population Distribution by Age and Sex Ratio

The 2002 Population Census showed that the sex ratio for Newala District Council was 86.2 males for every100 females in Newala District and the sex ratio for 2012 was 86 males for every 100 females in Newala Districts (Table 1.8). In 2012 however, Females were more than males in all wards. Chiwonga had the highest sex ratio of 92 males for every 100 females. The wards with lowest sex ratios were Makote and Makukwe wards which had 82 males for every 100 females each.

Source: NBS, Computed Data from 2002 and 2012 Population Census Report, Mtwara Region, 2016

Table 3.1 indicates that population distribution of Newala district, like other rural districts in Tanzania mainland; it is characterized by having higher people of younger age. The population based on five years age group and by sex is formed by many persons at the age below 19 years with more so on for girls than boys and the the amount of people with higher ages deacreases as ages goes above, this indicates that most of the people of Newala District are dependant by having more than 53% of the total population are aged below 19 and above 64 years which is not producing age groups. (Figure 1.2)

# 2.4 Major Economic Activities

Newala district Council is predominantly a rural district where agriculture is the main occupation of the people. Over 87% of the population depend on agriculture as the main source of income. Main food crops grown include maize, cassava, sorghum, paddy, sweet potatoes and a number of pulses such as groundnuts, pigeon peas, cow peas and bambara nuts. Cashew nuts are grown as the major cash crop it account for over 75% of that income. Other economic activities include animal husbandry, industry and commerce.

An industrial sector is not well developed in the district. Currently the council has small scale industries such as cashew nut processing, carpentry, tailoring, cassava processing and mechanics.

Trade is conducted at domestic level. There are about 7 wholesale shops and 327 retail shops. There are also petty businesses taking place. Major products traded mainly agricultural crops such as cashew nuts, maize, beans and finger millet. Others are charcoal, timber, firewood and carvings.

The district per capita income is highly sensitive to the seasonal fluctuations in the price of cash crops. The fluctuation in the price of cash crops especially cashew nuts has an impact with households income, council revenue and peoples wellbeing.

#### 2.5 Councils' Economy and Poverty Status

The available data revealed that council's revenue has almost doubled from TZS 1,343,351,578 in 2013 to TZS 2,430,472,563 in 2015, and cashewnuts crop has the largest contribution to the council's revenue increasing from TZS 533,136,652 in 2013 to TZS 1,474,290,128.61 in 2015. However, Billboard and Radio advertisement fees have indicated a rapid income increase from 2013 to 2015.

#### 2.5.1 Councils' Poverty Status

#### **Poverty Indicators**

There are different ways of measuring poverty; Besides GDP and per capita GDP, there are a number of indicators that indicate poverty levels in the Council. These indicators include, main source of cash income, food security, food consumption patterns, net enrolment, adult literacy rate, health indicators and access to drinking safe water. They also include housing conditions in terms of type of toilet, roofing material and source of energy for lighting as well as for cooking. Poverty can also be

measured using the Multidimensional Poverty Index (MPI). The index identifies scarcity across three dimensions as the Human Development Index (HDI) (health, education and standard of living) and shows the number of people who are multi-dimensionally poor and the types of scarcity with which poor households faces.

# **GDP and Per Capita GDP**

The Gross Domestic Product and Per Capita Income are the basic economic indicators used to assess the council's economic performance. According to the 2012 Population and Housing Census (PHC Newala DC's economy is dominated by agricultural sector which employs more than 87 percent of its population.

Council's GDP at current market prices increases from TZS 289,545 millions in 2013 to 871,277 in 2015 (83.7% increase) and agricultural sector contributes 46.8 percent of the total Regional GDP compared industrial and construction activity which contributes only 5.4 percent of the total Regional GDP. The per capital income at current prices for Newala DC also increased for about three times from TZS 1,385,980 in 2013 to TZS 4,069,771 in 2015.

#### **Main Source of Cash Income**

Newala DC main cash of income is cashewnuts, which falls under commercial agriculture, food crops and forestry industry. Basing on the 2012 Population and Housing Census for all persons aged 10 years and above, this industry employs 83.0 percent of persons in Newala District Council.

# **Accessibility to Clean and Safe Water**

According to the 2012 Population and Housing Census data show that, the largest proportion of the population in the council (62.6 percent) used non-improved sources of drinking water and 37.4 percent of them uses improved sources of drinking water. On the other hand, more than a half (50.2 percent) of the population used rain water collection and 32.8 percent used pipe water.

#### **Type of Roofing Materials**

The 2012 Population and Housing Census reveals that, the largest proportion of Newala DC 56.7 percent used grass or leaves as the main roofing material, followed

by iron sheets (41.3 percent) and 1.3 percent used mud and leaves as the main roofing material.

# **Source of Lighting Energy**

The 2012 population and Housing Census revealed that majority of Newala DC (73.1 percent) used kerosene for lighting, 11.3 percent were using torch or rechargeable lamps and only 5.4 percent are using electricity.

# **Source of Energy for Cooking**

Firewood remains the most prevalent source of energy for cooking in Newala DC (92.7 percent) as revealed by 2012 Population and Housing Census. Followed by charcoal (5.6 percent) and electricity (0.2 percent), the remaining population used less than two percent energy for cooking.

# **Literacy Rate and Level of Education**

Generally the results reveals that Newala District still is not at the better position of eradicating illiteracy rate thus more effort is needed so as to improve the amount of people who are literate. In fact illiteracy levels differ among districts in Mtwara Region. The district council with the highest illiteracy rate was Mtwara District Council (44.0 percent) followed by Nanyumbu (41.5 percent), Tandahimba (37.3 percent) and Newala (31.6percent). The district council with the lowest illiteracy rate was Masasi Town council (21.2 percent) and Mtwara Municipal Council (19.7 percent), this is as revealed by 2012 Population and Housing Census.

# **Food security**

Food security in Newala DC is very good. The number of meals consumed in a day is satisfactory.

The National Sample Census of Agriculture 2007/08 reveals that the majorities of rural agricultural households in Newala DC normally have two meals per day (63 percent of total households), while 32 percent have three meals. Moreover, the results also indicate that 5 percent of the total households have one meal per day. These results indicate that food insufficiency affects a very small proportion of the agricultural households in the Council as 95 percent have either two or three meals per day.

# 2.6 Climate, Soil and Topography

#### **2.6.1 Climate**

The Council experiences a seasonal monsoon rainfall that normally starts in November and ends in May. The average annual precipitation is about 1,000mm with a poor distribution pattern that is irregular, with unreliable rainfall. There is a pronounced dry spell of one(1) to two(2) weeks duration between Mid-January and Mid-February. On average the council experiences about 81 days of rainfall annually with most rain falling between December and April. The annual mean temperature is 22° C.

#### 2.6.2 Soil

The dominant soil type in Newala district council is sand soils which is highly susceptible to soil erosion. The Makonde escarpment is characterized by loamy-sand soils and some parts loamy-gravel soils.

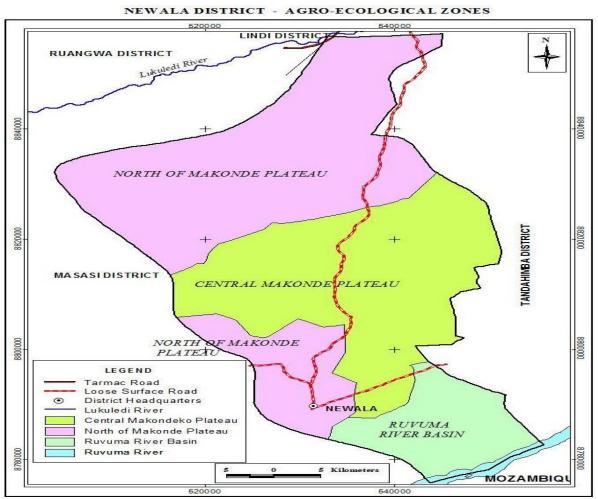

The soil has greater ability to retain nutrients and therefore potential for agriculture and does not need more water. The black clay soils mostly saturated water within 100 cm of the surface long enough to restrict the range of crops that can be grown.

Most of these soils have high nutrient contents and are considered suitable for a wide range of food and cash crops and therefore have the potential for profitable cultivation. Among of the crops that are being grown to this soil type available in Newala are Cashewnuts, Cassava, beans, Maize and Groundnuts.

#### 2.6.3 Topography

Newala district which is within Mtwara Region is dominated by physical features known as Makonde Plateau which rises in a sheer escarpment at about 812 metres above sea level. The escarpment itself is between 200 - 300 metres high and stretches in an almost unbroken line across the horizon. There are several natural gorges in Newala District, one known as "Chilolelo Gorge" located in Miyuyu Village in the northwest of the district.

The Makonde plateau and other part of the district are widely covered by cashew nuts plantations and other food and cash crops. The natural vegetation has to a big extent been disturbed by human activities and still exists only along the Makonde escarpment, an area which was declared by the Local Government Authority as a reserve for water resources.

# 2.7 Agro — Ecological Zones (AEZ)

Newala district is characterized by three agro ecological zones namely the North of Makonde Plateau, Central Makonde Plateau and Ruvuma River Basin. All zones has been summarized below to show the characteristics of these ecological zones in the district. While the North of Makonde plateau and Central Makonde plateau are located above 500m above sea level, the Ruvuma River Basin is located at an altitude of 200 – 500m above sea level. All the three ecological zones receive more or less the same amount of rainfall between 800-1000 mm per annum. However the

North of Makonde plateau is not suitable for cashew nuts production while the two other ecological zones are potential for this crop and other ones.

# (i) Zone I

The Makonde Plateau rises in a sharp escarpment of about 812 m above sea level. The escarpment itself is between 200 - 300 m high and stretches in an almost unbroken line across the horizon. It has been covered by natural vegetation at large area.

#### (ii) Zone II

The central and part of south plateau are almost covered with cashew trees and annual crops like Cassava, Sorghum, Maize, Bambaranuts, Groundnuts, Sweet potatoes, Pigeon peas and Cowpeas.

# (iii) Zone III

The northern part is covered with bushy and small farms of annual crops such as Cassava, Sorghum, Maize, Bambaranuts and Groundnuts. The far south is Ruvuma river basin where Paddy, Cashew nuts, Cassava, Simsim, Maize and Vegetables are being produced.

#### **CHAPTER THREE: THE SITUATIONAL ANALYSIS**

#### 3.1 An Overview of the Council Performance

Newala District Council was formed in 1954 under the Local Government Ordinance 1953 Cap. 333. It is almost 63 years (2017) since its establishment. Despite the remarkable improvement in provision of socio-economic services within our community, still there are some challenges being facing the organizations in provision of those services to its people. Among other things the council is inadequately supplied with clean and safe water, there is shortage of teachers' houses, classrooms, toilets and administration blocks both in primary and secondary schools. The council is understaffed in various departments where primary education department has high demand of staff than any other department. Again, there is inadequate provision of health services due to lack of improved health infrastructures. Following these situations the council has decided to review its strategic plan in order to accommodate some strategies that can help in finding solutions of the existing challenges. The following explanations give some overview of the current status of service delivery in each sector.

#### **3.1.1 Existing Status on Provision of Various Services**

#### **Health Sector**

The council continues to improve provision of health services to its people through the existing health facilities. Currently the council has 3 health centres and 22 dispensaries. So far the council has no hospital. In provision of health services, the council faces some challenges including shortage of staff, vehicles (e.g one ambulance for Mkwedu Health centre), and lack of required infrastructure in various health facilities, irregular supply of medical equipment and medicines and absence of permanent latrines. The council has a shortage of 1 Hospital, 19 health centres and 66 dispensaries. In terms of manpower, health sector has 116 staff against requirement of 484 staff, hence having deficit of 368 staff.

In fact the council is still facing a challenge of manpower requirement in its health facilities as the problem been increased due to establishment of Newala Town Council, an attempt that called up on sharing the same number of existing staff. The

actual shortage is almost seventy six percent (76%) of the actual requirement. Consequently, some staff in all health centres and in some dispensaries which have one or two staff normally works beyond normal working hours. Lack of staff in some cadre is resulting into task shifting, hence increased workload to some staff by performing more than one task. However the increased staff workload reduces the degree of handling of patients who require attention in provision of health services.

The following tables show current status of health facilities in the council.

**Table Na. 1. Existing Number of Health Facilities** 

| Type of Health<br>Facility | Requirement | Availability | Deficit | Under<br>construction | Percentage<br>Under<br>Construction |
|----------------------------|-------------|--------------|---------|-----------------------|-------------------------------------|
| Council hospital           | 1           | 0            | 1       | 0                     | 0%                                  |
| Health centers             | 22          | 3            | 19      | 0                     | 0%                                  |
| Dispensaries               | 88          | 22           | 66      | 5                     | 7.58%                               |

# **Primary Education Sector**

The council has 74 primary schools owned by government. Currently there is no privately. With reference to the National Education and Trainning Policy of 2014, all of these schools area the centres of Early Education and Adult Education, in other word the council has got 74 centres of each category of education service (Early education and Adult education). Early education classes have got 6,101pupils of which 3,097 are males while 3,004 are females. The numbers of pupils in primary school classes is 25,544 of which 12,641 are males while 12,903 are females. The district has got 443 teachers of which 421 are class teachers while 22 are the ward education officers. Teacher - pupils ratio is 1:61 In the area of school infrastructures the council has 455 classrooms with a deficit of 250 classes, 537 toilet drop holes with a deficit of 559 drop holes and 164 staff houses with a deficit of 623 houses.

# **Operation of the National Education and Training Policy**

The implementation of National Education and Trainning Policy of 2014 and the Primary Education Development Program, the council has designed Educational Strategic Plan aimed at increasing enrolment of early child education, primary school education and adult education. Also, the strategies are directed towards controlling attendance of teachers and pupils, increasing pass rates and providing better education to all. The council has designed a strategic plan in order to respond to the current situation of education services and its effects.

The report of National examination result of standard seven (PSLE, 2016) revealed that Newala district council was positioned on number 8 out of 9 councils of Mtwara region. The pass rate decreased from 71.2% in 2015 up to 56% in 2016. Again examination results gradually rose from 56% in 2016 to 66% in 2017. The council strategic plan is directed to implement government's education goals to include enrolment of all age school children, youth and elders and provide them with better basic education as their basic human rights.

#### **Provision of Education Services**

Enrolment of pre-primary education has increased from 6,421 in 2015 up to 6,541 in 2016, equal to 1.9 % of the previous year. Primary schools in 2015 enrolled 5,331 pupils and in 2016 the enrolment was increased by 3.2% up to 5,501.

The increased enrolment was due to these factors:-

- Introduced basic education policy which emphasizes children to attend early child education before they start class one.
- Sensitization of children enrolment to school by the local and central government.
- Provision of foods to the children during the day at school.
- Sensitization of Free education policy which has been implemented national wise.

Attendance of primary school pupils has increased from 86% in 2014 up to 89% in 2017. The increase was due to these reasons:-

- Provision of health services and counseling at school.
- Provision of treated mosquito nets to pupils at school yearly.

Adult education is a part of educational services provided by the council but the attendance is not satisfactory due to the reasons such as negative attitude toward adult education, deficit of teaching and learning facilities, teaching staff buildings. The number of upgraded teachers is increased from 16 in 2014 up to 27 in 2017.

# **Challenges of Primary Education**

In terms of education sector, the council faces some challenges that hinder implementation of prescribed educational objectives. Some of these challenges include:-

- Deficit of 2,960 desks for pre-primary pupils.
- Deficit of 559 toilet drop holes out of 1206 for pupils, equal to 46.4% of the demands.
- Deficit of 250 classrooms out of 705, equal 38.4% of the demands.
- Deficit of 623 staff houses out of 787, equal to 79.2% of the demands
- Deficit of 366 teachers out of 787, equal to the 46.5% of the demands.
- Unsatisfactory teaching done by the teachers.
- Inconsistence provision of food to the pupils at school.
- Absenteeism and drunkenness of the teachers during working hours.
- Less response towards education by the parents and community in general.
- Crowdness of the pupils in the classrooms (Ratio 1:61 1: 89).

#### **Strategies to improve education performance**

- i. Regular supervision and follow up of teaching activities at school levels.
- ii. Emphasize teaching in extra time in order to help pupils with a problem of less ability on 3Rs (Reading, writing and counting).
- iii. Creation of a program which involve teachers and parents (**UWAWA**) responsible for involving parents to supervise pupils' academic development and alleviate prevailing challenges.
- iv. Creation of a body called **MJUUE** responsible for sensitizing community in village and ward levels to contribute on educational development.

- v. Emphasize school committee and community to contribute food stuff for their children in order to increase provision of food from 47 schools up to 74 schools council wide.
- vi. Emphasize environmental improvement to the extent that can attract pupils to stay and learn comfortably.
- vii. Provide gifts to the teachers and pupils who perform better in the teaching and learning activities.
- viii. Establish and control uses of class journal, class notes and scheme of work.
- ix. Conducting in-service training to the 420 teachers.
- x. To ensure availability of teaching and learning tools and other facilities for learning purposes.
- xi. Improving teaching and learning environment in order to provide better education.

# **Secondary Education Sector**

Newala district council has 16 secondary schools out of them 15 are owned by the government and 1 is privately owned. There are 3,657 day school students and 62 boarding school students. The district has only 180 teachers out of 296 required, has a shortage of 115 teachers. Table below shows the total Number of student by each class, teachers and school infrastructures.

# **Educational Challenges**

- Shortage of science teachers. The council has a deficit of 69 (54%) teachers.
- Students' absenteeism. 12 percent of the total number of students do not attend school daily
- Poor commitment to some of the teachers.
- Acute shortage staff houses. The council has a shortage of 130 (70%) staff houses.
- School pregnancies. From January to December 2017 the council had a total of 16 girl students who left school because of pregnancies.

#### **Strategies for remedying the challenges**

 Regular school monitoring. The department has planned to visit three schools weekly to talk to teachers and address the available challenges.

- To construct some of the missing school infrastructure like staff houses, classrooms and toilets. The council is under construction of 6 staff houses at Lengo secondary school, 9 classrooms at Lengo 2, Makukwe 5, Vihokoli 2 and Malatu 2.
- Improving school feeding programs by making sure students have at least one meal at school.
- Raise education awareness among parents and the society through mass media education. This will be done through school parents meeting, education stake holders meeting, and local radios.

i) Number of secondary schools students- O-level (day)

| Class    | Number of Students |       |       |  |  |  |  |
|----------|--------------------|-------|-------|--|--|--|--|
|          | Boys               | Girls | Total |  |  |  |  |
| Form I   | 622                | 637   | 1,259 |  |  |  |  |
| Form II  | 586                | 704   | 1,290 |  |  |  |  |
| Form III | 347                | 389   | 736   |  |  |  |  |
| Form IV  | 214                | 158   | 372   |  |  |  |  |
| Total    | 1,769              | 1,888 | 3,657 |  |  |  |  |

# ii) Number of secondary schools students- A-level (Boarding)

| Class   | Number of Students |       |       |  |  |  |
|---------|--------------------|-------|-------|--|--|--|
|         | Boys               | Girls | Total |  |  |  |
| Form V  | 45                 |       | 45    |  |  |  |
| Form VI | 20                 |       | 20    |  |  |  |
| Total   | 65                 |       | 65    |  |  |  |

# iii) Secondary school teachers

| Staff establishment | Requirements | available | Deficit |
|---------------------|--------------|-----------|---------|
| Science             | 128          | 59        | 69      |
| Arts                | 168          | 118       | 50      |
| Total               | 296          | 177       | 119     |

# iv) Secondary schools' infrastructure

| Item Requirements |     | Available | Deficit |
|-------------------|-----|-----------|---------|
| Classrooms        | 131 | 117       | 27      |
| Staff houses      | 184 | 54        | 130     |
| Laboratories      | 45  | 5         | 40      |

NB: All 40 laboratory buildings are under construction at finishing stages.

#### **Water Sector**

The main source of water in Newala District is underground water found in seven different villages seen table below. Other sources of water in the district are shallow wells and rain water harvesting tanks. Generally, the council has water scarcity due to power shortages and leakage within the water distribution system. Average required consumption of water is about 7,000m³ per day. Only 2,170m³ which is about 31% of the water requirements is produced per day.

Currently, there are 13 shallow wells in the district and 9 of them (or 69.2%) are working producing about 7.2 m³/day. However, many of these sources are not well protected so there is high risk of contamination. About 14,910 households have water harvesting tanks making up about 30% of all households in the district, among them 9827 are in good working condition and other 5827 need rehabilitation. However, water schemes in Luchemo and Mbwinji villages are currently not working as they were washed away by floods in 1992. In general, only 35.4% of all households in Newala District council have access to clean and safe water supply. This calls for efforts to ensure the district attains the set national target which requires that by 2015 at least 65% households should have access to potable water within 400m.

Table summarizes the water schemes in the district, their average water production per day and source of power.

Table: Distribution of water schemes, average production and power Source

| Scheme name        | Scheme<br>type | Production potential (m³/day) | Source of power |
|--------------------|----------------|-------------------------------|-----------------|
| Mkunya             | Natural spring | 3200                          | Electricity     |
| Mdimba - Malatu    | Bore hole      | 240                           | Diesel engines  |
| Kitangari (Mitema) | Bore hole      | 17280                         | Electricity     |
| Chiwambo           | Bore hole      | 860                           | Not working     |
| Luchemo            | Natural spring | 200                           | Not working     |
| Mbwinji            | Natural spring | 800                           | Not working     |
| Mitanga            | Bore hole      | 200                           | Diesel engines  |

Source: District Water Engineer, 2017.

It was highlighted that, a 20 litres' bucket of water is sold at Tshs. 50 in public taps, Tshs. 200 to 500 in privately owned water taps and Tshs. 300 to 1,000 during crisis time. This is very costly especially for poor households with large family sizes making them resort to unsafe sources.

# **Agriculture, Irrigation, Cooperatives and Marketing**

Agriculture is Newala's largest economic sector. Farming is of small scale with hand held hoe being the common tilling tool. Staple food is maize, cassava and paddy. In terms of cash crops, cashewnuts and pegion peas provide significant contribution to the district's economy. Sweetpotatoes, bambaranuts and groundnuts are other food crops of insignificant importance. Off-farm income is mainly sourced from tree/forest resources, livestock keeping and remittances In general, crop production levels per unit area are low due to different reasons, such as; the use of out-dated, inferior agricultural implements (mostly hand hoes, panga) and also the use of local seeds especially in maize and cassava crops, soil exhaustion and soil infertility. Agriculture classification comprises of crop cultivation and breeding of animals, forestry and hunting sub sectors. Others are beekeeping and tourism.

#### **Distribution of Arable Land**

The district has a total area of 164,164.5 hectares of which 144,540 hectares are suitable for agriculture. However, it is only 122,859 hectares that are utilized. Food crops grown include cassava, maize, sorghum, paddy and legume. Cash crops include cashew nuts, groundnuts, and sunflower. The constraints facing agricultural development include dependence on seasonal rains, use of hand hoes and shortage of extension officers, unreliable markets for agricultural produce, lack of agricultural processing factories and lack of agro-input suppliers at village levels.

#### **Area under Food Crops Cultivation**

Maize and cassava are major food crops grown in Newala district council. However, cassava is the most food crop grown in the district council occupying 79.4 percent of the total arable land area under main food crops cultivation and it is highly produced

by 92.6 percent of the total production. Maize is the second major food crop in terms of the area under main food crops cultivation. It covers about 20.6 percent of the district total land area under major food crops.

# **Area under Cash Crops Cultivation**

Cashewnut is the major cash crop in Newala district council followed by pigeon peas. Normally averages of total cultivated land of 49,788.6 hacters are planted with cashew crop. This is about 94.4 percent out of 52,728.6 ha of cultivated area in the district. Other cash crops produced in Newala district includes bambaranuts and groundnuts which are harvested earlier than cashewnuts and pigeon peas.

#### **Crop marketing**

Newala District Council own revenues to large extent depends on marketing of cultivated crops. Cashewnuts is the leading crop in terms of the amount sold and the value being earned. For example in 2014/2015 TZS 24.8 billion was earned (73.2 percent of total value earned). The second crop was pigeon peas earned TZS 6.6 billion (9.5 percent of total value earned) in 2014/15. Maize was the lowest crop sold amount TZS 610 million (1.8percent of te total amount earned).

#### **Irrigated Agriculture**

Newala district has a potential area for irrigation. The council has two areas (local schemes) for irrigation, which are Chikalule and Lochinu. The two local schemes have total area of 190ha of which is 50.4 ha are utilized. In order to encourage irrigation the council through TASAF has a project of construction of drip irrigation (3 acres) at Chikalule scheme. The major crops irrigated were Paddy, vegetables and maize.

# **Farm inputs**

There is high use of pesticides, insecticides and fungicides especially in cashewnuts due to the agricultural inputs education provided to farmers by extension officers. Newala district council like other districts in Tanzania, struggle to increase availability of agricultural inputs especially insecticides, pesticides, chemical fertilizers and improved seeds among small scale farmers.

# **Fungicides**

Sulphur dust is the most important fungicide used in cashew production for distraction of fungi which reduces production of the crop. It is generally observed that distribution of fungicides mostly depends on the demand from farmers and type of crops grown in a particular location.

#### **Improved Seeds**

Seeds are the primary basis for human sustainability for food. Use of improved seeds is among important factors for increasing agricultural productivity (output per unit of land). Cashew nut seedling (55.2 percent) is the leading crop in having a wide range of improved seeds in the district council. Another crop is maize (OPV) with 39.8 percent of improved seeds which were mostly distributed in the district council the past years. Other improved seeds for Paddy (TXD) with 4.8 percent and Cashew seed (0.3 percent) were distributed in minimum quantities.

#### **Agriculture Implements**

The use of agriculture implements depend on the size of farms owned by households and or investors. Newala district council is among districts in the Mtwara region with largest population being small farmers, owning about 1 to 4 hectares with perennial crop that is cashew nuts resulted to less demand of farm implements such as power tillers, tractors and other farm implements. In 2014/15 a total of 16 tractors were distributed in the district against a demand of 130 tractors. Generally Newala district council, through agriculture department should educate their farmers on the need of changing farming system from tradition to modernized agriculture in order to increase their productivities.

#### **Investment Opportunities in Agriculture Sector**

Potential areas for investment in Agriculture include: crop production; Supply of agriculture inputs such as fertilizer, insecticides, seeds etc at affordable prices; Supply of farm implements such as power tillers, tractors, ox-cats etc at affordable prices; Agro- processing industries for cashewnuts, cassava, fruits and maize. Also there is about 1025 ha for Irrigation which is not utilized out of 1820 ha it can be

used to produce paddy, vegetables and maize to increase household income and food security in the district.

# The following are some Agriculture, Irrigation, Cooperatives and Marketing performance indicators

| Item to be measured                               | 2015/2016     | 2016/2017                |
|---------------------------------------------------|---------------|--------------------------|
| Agriculture                                       |               |                          |
| Number of youth engaged in agriculture activities | 486           | 584                      |

| SACCOSs                                           | 11            | 11                       |

#### **Livestock Sector**

The district council has 787 cattle, 77,131 goats, 843 sheep, 420 pigs, 275,033 chickens, and2 40 ducks. Most of these livestock species are local breeds. Currently, there is an improvement in the performance of the sector through the effort done by the government to reduce disease and parasites.

The livestock keeping sector makes significant contribution to food security as it provide protein type of food through consumption of meat, milk and eggs from poultry. It play role in poverty eradication and maintaining soil fertility at household level and district level through provision of manure for maintaining soil fertility and addition of organic maters to the soil.

#### **Grazing Area**

Data show there was no shortage of grazing area in the district council as planned at the same time the district council has no tsetse fly infected area or land. In 2015 estimated land used for grazing area in the district council was 5,000 hectares.

#### **Livestock Infrastructure**

There is no working dip in the council. Also no veterinary centres. In Newala district council had not yet well endowed with facilities like crushes, abattoirs, hides and skin sheds, slaughter slabs, livestock market or auctions and accessibility of water improve the quality of livestock.

# **Marketing Livestock and Their Products**

Lack of proper procedure of marketing livestock have created a problem of getting actual number of livestock marketed and the amount of revenue collected from each type of livestock in the district and region at large. However, in 2015 a total of 338,007 livestock valued at about TZS 852.2 million were marketed in the district. Goat and cattle were the main contributors to the district's total revenue obtained from marketing of livestock in 2015.

#### **Milk Production**

Milk production in Newala district council was 43,200 litres in 2015. The revenue collected from milk production was TZS 64.8 million in 2015. The revenue collected was influenced by high average price rates of 2015 which was 1500 TZS/litre.

# **Investment Opportunities in Livestock Subsector**

Newala district has high availability of markets for livestock products such meat and skin. Dairy farming of both goats and cattle investment is required so as to improve productivity. Livestock processing industries such as milk processing and meat canning are required to improve the subsector.

# **Challenges facing Livestock sector**

Low productivity, lack of financial Resources to implement Livestock and Fisheries projects, sometimes there is an outbreak of animal disease like, Pestes Des Petits (PPR), contagious caprice Pleuropneumonia (CCPP), Foot and Mouth Disease (FMD).

Furthermore, livestock sector is constrained amongst other things by lack of adequate of livestock infrastructures, and inadequate number of staff as shown in the following table below.

| No. | Designation             | Titles | Required | Available | Deficit |
|-----|-------------------------|--------|----------|-----------|---------|
| 1   | Livestock Officer       | LO     | 1        | 1         | 0       |
| 2   | Vetenary Officer        | DVO    | 1        | 1         | 0       |
| 3   | Livestock Field Officer | LFO    | 5        | 3         | 2       |
| 4   | Fisheries Officer       | FO     | 2        | 0         | 2       |
| 5   | Livestock Field Officer | LFO    | 19       | 3         | 17      |

In order to improve livestock sector, among other things; it is required to conduct sensitization and training among Livestock keepers on the importance of putting aside the budget for procurement of drugs and vaccine for their animals, to increase extension services delivery to improve the standard of production and productivity and promoting dairy cattle and goats' husbandry.

#### **Road Sector**

Road sector is a major contributor in socio-economic development in the council. The sector is one of the key sub-sectors that are responsible for sustainable development and poverty reduction in rural areas as it accelerates economic growth and hence contributes a lot in poverty reduction. Hence District and feeder roads are

an important link and most of them are connected between existing Regional Roads within the District.

The council depends entirely on roads as means of transport in and out of the district. Most of the roads are passable throughout the year but some roads especially those along or in the Makonde escarpment are not passable and cause some of the villages to be inaccessible by vehicles during rainy season. The council district has a road network of **847.472** km. This consisting of district and feeder roads of 800.772 km.

**Table showing Roads network in Newala District Council** 

| Type of                                | Length of Roads (km) |        |        |                | Total             |         |
|----------------------------------------|----------------------|--------|--------|----------------|-------------------|---------|
| Road                                   |                      |        |        |                |                   |         |
|                                        | Earth                | Gravel | Tarmac | Stone pavement | Concrete pavement |         |

| Community<br>Road                      |                      |        |        |                |                   |         |
| Total                                  | 771.252              | 69.5   | 6.0    | 0.20           | 0.52              | 847.472 |

**Source TARURA - Engineer, 2017** 

#### Wildlife and Tourism

Despite of several historical and geographical attractions sites, no effort have been for promoting such sites as tourism centers. This has been due to lack of awareness and resources.

### **Beekeeping**

Beekeeping is a high potential for income generation leading to poverty alleviation. However, the production of both honey and wax is still insignificant; this has been due to inadequate extension services and lack of active stakeholder's involvement.

#### **Land and Environmental issues**

Despite the education being provided to the community regarding the importance of protecting our environment, still management of natural resources and lands is a problem. The district is experiencing a number of environmental threats such as deforestation, soil erosion and desertification due to agricultural activities practiced in fragile land like the Makonde escarpment and water catchments, massive tree cutting for energy and building materials and bush fires. Although charcoal and firewood production along the Makonde escarpment is prohibited, there are indications that communities along the escarpment carry out these activities illegally as charcoal and firewood still constitute the main source of energy for most of the people in the district.

While the National Forest Policy requires each district council to have a forests harvesting plan, this has not been done in Newala district due to lack of harvestable forests. The district council is using a number of legislations such as the Forest Act No. 14 of 2002, Environmental Act of 2004 and District by-laws of 2012 and 2017 to deal with these challenges. The district by-laws are currently in the process of being amended. The district council is however facing challenges in enforcing these legislations due to limited number of staff and means of transport. Other measures being undertaken in the district include tree planting, environmental education and communication, waste collection and disposal and construction of water drainage systems for rain water.

#### **Human Resources Administration**

Newala District Council comprises a total of 13 Departments and 6 Units this is according to the new Council Organizational structure. The Council has a total number of 929 employees while the 2,393 employees are required hence making deficit of 1,464 staff.

Through this department, the council is always ensuring that there is good governance both at lower and higher levels, capacity building development, coordination of awareness campaigns on HIV/AIDS amongst employees and creating conducive working environment favorable to council staff to deliver quality and effective services. The department has continued to manage and coordinate the establishment of village bylaws and supporting villages and wards to conduct statutory meetings.

However, the council is facing several challenges including inadequate number of staff in various sections, lack of consolidated training programme, poor implementation of OPRAS, lack of systematic induction training for newly employed staff, lack of adequate mechanism to enforce code of conduct for council employees and uncoordinated awareness campaign for HIV/AIDS and anti-corruption.

The following table shows the status of staff requirement

| No. | Department/ Section                     | Requirements | Available Staff | Deficit |
|-----|-----------------------------------------|--------------|-----------------|---------|
| 1   | Human Resource and Administration       | 258          | 128             | 130     |

|    | JUMLA             | 2,393 | 929 | 1,464 |

#### **Community Development Sector**

In ensuring that the community is participating full in development issues, community development department as a cross-cutting sector normally pave the ways for other sectors to work properly. The sector undertake roles of mobilization of people towards fully participation, integration of sectors and coordination of activities of development and poverty reduction and improving the living standards of the rural population involves mobilization and equitable allocation of resources in order to raise welfare and enhance productive services. The sector has managed to supervise provision of loan to economic groups, conducted pre-loan training to women, promotion of Civil Society Organizations and establishing and enhancement of village community banks. All these are contributing in poverty reduction.

Despite the roles played by the sector in fostering the philosophy of self-reliance at community level, still the sector is faced by various challenges including iinadequate number of Community Development staff, lack of working tools and equipment, lack of transport and inadequate fund for enabling work.

#### **Finance and Trade**

The finance section has been monitoring revenue collection and controlling expenditure in accordance with the financial procedures and regulations. The sources of own source revenue include produce cess from cashew nut crop, maize, pegion peas, fees and user charges. Challenges in revenue collection include dependency cashew nut cess as the major source, high revenue collection costs and

questionable integrity and honesty of some revenue collection staff particularly at village level.

The trade section has been engaged in improving the business environment which includes simplified procedures for issue of trade licenses and provision of basic business education to traders. The major constraints are inadequate cooperation from small and medium traders in fear of taxation.

## **Stakeholders Analysis**

Following government accountability to the public, increased speed in solving community challenges and fulfilling its day to day functions, Newala district Council found having increased number of stakeholders with different expectations. Following such situation, the council has conducted stakeholders' analysis to understand the extent to which stakeholders expect from council. The following table summarizes the stakeholders and their expectations:

| S/N | STAKEHOLDERS                                  | EXPECTATIONS/INTERESTS                                                                    | POTENTIAL IMPACT                                      | PRIORITY<br>RANKING<br>(H,M,&L) |

#### **CHAPTER 7: MONITORING AND EVALUATION SYSTEM**

## 7.0 Importance of Monitoring and Evaluation (M&E):

In order for our vision to become real, Newala District Council shall be carrying out monitoring and evaluation of its planned projects and activities from time to time. This exercise will;

- (a) Ensure the planned projects and activities carried out according to priorities set during the annual budget preparation each year.
- (b) Determine the impediments in the budget process which inhibit effective service delivery and hence corrective measures be taken.
- (c) Determine the level of performance of the Council in terms of service delivery and promises to the people by our National Leaders and promises as directed/stipulated in the Ruling Party Manifesto.
- (d) Enable transparency of the Council and build peoples' confidence.
- (e) Have Medium Term Expenditure Frameworks (MTEFs) each year as a tool to link Council objectives, targets and activities and even enable MTEFs itself to be monitored.
- (f) Monitoring and evaluation of this 5 year Strategic Plan will be conducted from time to time to gauze the progress achieved.
- (g) The step of Monitoring and Evaluation will be able to provide information that will feed back into the review and update the plan to accommodate the rising issues.

#### 7.2 Reports:

The Council shall ensure that has important information to enable it to continue carrying out budget process which is accurate and timely prepared. Such information shall enable the Council Management to make appropriate decisions. Various reports shall be required and shall include but not limited to Revenue Reports, Recurrent Expenditure Reports and Development Reports.

Revenue Reports shall include Revenue Flash Reports, Monthly statement of Revenues collection, Monthly revenue collection Progress Reports, mid-year and Annual Revenue Collection Report. Recurrent Expenditure Reports that includes monthly Expenditure Flash Reports. Monthly Statement of Expenditure Reports, Monthly Financial Progress Reports, Quarterly Reports of Commitment and Expenditure, Mid-year Revenue Report and annual financial Report.

Development Expenditure Report which includes Monthly Flash Reports, Quarterly Financial Performance Progress Report, Quarterly Physical Implementation Progress Report, Mid-year Review Report and Annual project Performance Review Report.

In these financial reports it will be evident that accounting caters for maintenance of records of financial transactions in the form that is required for day to day operation including financial control and also.

Ensure the use of Integrated Financial Management Systems (IFMS) to provide the reports of all financial transactions. The use of computer EPICOR System serves the purpose.

Council shall also ensure that physical implementation of the projects is carried out in most efficient and effective way to reflect the value for money for all projects implemented. This shall always be done by a team of people of various disciplines (leader such us members of Parliament, Councilors, District Commissioner, Technical persons from the Council). The team shall inspect the projects on quarterly, mid-yearly and annual basis.

Council shall always perform Expenditure tracking exercise, where all the money from the Council to lower level shall be tracked, analyzed and expenditure reports tabled to various statutory meeting such as District Finance committee, Council Committees responsible for finances, District Consultative committees and to the public. Expenditure tracking shall also be extended to wage component of the budget with the aim of monitoring and controlling the same.

There shall be Monitoring and Evaluation tools as follows:

- ✓ Every unit and every section in the Council shall be doing monitoring of the planned activities.
- ✓ There will be a team of Council CMT that will be conducting and scheduled (Quarterly & Mid–annual) monitoring and evaluation missions.

#### **ROLES AND DEFINITION OF COUNCIL ORGANS**

#### The full council

Its main duty is to approve or disapprove agendas forwarded by standing Committees and provide necessary advice where applicable for the benefits of the Newala District Council community.

# Finance, management and planning committee

The main duties and roles of this Committee are to ensure effective collection of the Council revenues and control of public expenditure.

## Education, health and water committee

To deal with all matters pertaining to Education, Health and water in the District, including ensuring effective involvement of people at all levels with respect to improvement of social services.

## Economy, works and environment committee

Generally committee is responsible for the development of production activities in the District including Agriculture, Livestock, Industries, and Trade etc. Similarly, it also deals with infrastructure and issues of Land and Environment development.

#### **HIV/AIDS Committee**

The committee is responsible in dealing with HIV and AIDS matters e.g. supporting people living with HIV and AIDS and taking preventive measures to the community through provision of condoms and dissemination of HIV and AIDS education in primary and secondary schools.
